Your Property Periodical

Happy Fall, Y'all

At this writing, we have had the unofficial start of Fall. So often when Labor Day hits, our thoughts turn to holidays and events indoors; yet, there are a couple of good months to spruce up your landscaping. Right now is the perfect time to evaluate how your property looked this spring and summer. Were there enough bulbs flowering as the snow was melt-

ing? Did you hope to get a new firepit installed for roasting hotdogs and marshmallows, but it never happened? These are just a couple of things that you can complete before winter. Give us a call if you need help bringing your ideas to fruition.

Or check out my article in Compass Media's Fall edition at all Giant Eagle Market District

stores. You'll find this beautiful magazine right next to the entrance/exit with other publications.

Our office will be closed beginning Saturday, September 16th and re-open on Monday, October 2nd. As always, feel free to contact Denny on his cell phone at 330-685-3637.

- *Kathy*

When planning your flower garden next spring, you may wish to consider petunias and snapdragons. Each of these produce a scent that attracts pollinators, but is disliked by stink bugs. Who, by the way, carry the full name of the Brown Marmorated Stink Bug. This fragrance is being studied by scientists who already produce a fragrant chemical called methyl benzoate. This is a popular ingredient in foods, cosmetics and shampoo and in test studies has proven to kill the stink bug. There are few choices available when it comes to controlling stink bugs, so you might as well enjoy the beauty of petunias and snapdragons while benefitting from eliminating these annoying little creatures.

Pond Wiser offers flower planting in landscape beds or in containers. Give us a call if you need help this fall or in the spring.
