It's the Perfect Time to Sit by the Fire

- Non-packaged firewood must be sold by the cord or by fractions of a cord. One cord, when properly stacked, should be 8 feet long by 4 feet high and 4 feet wide (128 cubic feet).
- If sold in bulk, firewood must be purchased by the weight in ton measurements. This must be weighed on a certified scale.

Stacked firewood.

- It is illegal to sell firewood by any other unit of measurement such as a rick, rack, face cord or truckload. If a consumer believes that a seller did not comply with these rules and regulations, the person should immediately contact the seller.

Have you every considered this?

Most of you probably jump in your car and drive to your office each day and don't get to observe what is going on outside around you each day. One of the great things about working outside is being part of nature. It also provides us with the opportunity to see what is happening around us. One of the main reasons for starting this business was to be part of beautifying the world around us and teach others how to correctly care for the water around them.

**We need nature.
Nature doesn't need us.**

Something we routinely see are people disposing of things into water. Last season we were called to a few lakes because there was "something" in the water. It wasn't the Lochness Monster, but actually something someone had put in the water. Most times, it ap-

peared to be a cleaner or paint. Then our guess was confirmed when we saw someone dumping a bucket of mop water and on another occasion cleaning out a paintbrush into the lake. When approached, the homeowners became angry and didn't want to believe that the "little bit" they were putting in the water would cause any problems.

Toward the end of last year,

we had an extensive job at one location so it allowed a lot of time to notice neighbors dumping their leaves and grass into a stream behind a row of houses. If you are someone who does this, have you considered what happens? Not only do all your grass and leaves flow downstream to others properties, it also releases lawn chemicals and animal feces into the water. This causes sludge build-up and algae growth and can pose health risks in the long run.

Please make a New Year's resolution to do better. Your neighbors will thank you, HOA's will have an easier time controlling weeds and algae in their retention ponds, and everyone can be assured our water in not being polluted.

In 2016, specials will be advertised on our mobile app ONLY.

Little Bigger

Have you downloaded our mobile app yet? Well, what are you waiting for? It's a great way to stay in touch with everything Pond Wiser and we've added a tab for all the tadpoles out there. You will find mazes, coloring pages, a song, nature trivia, and our new game, Little

Bigger. It starts out like the game Frogger, but get to the lily pads and see "hoppy" moves. It is a family-friendly app.

Unfortunately, only Apple users can get to the game at this time. Our IT guys are trying to get it Android approved. We are so fortunate

to work with Synergy Online Solutions for these kind of problems.

Come on, hop onto our lily pad! We have over 700 Twitter followers, 500 on Pinterest, 250 on Instagram and 1200 likes on Facebook. Thanks to all and the more the merrier!
